BOOTCAMPS

- Checklearn Web Development Course
- OIC HUB Web Development Course
- FreeCodeCamp FrontEnd Web Development Course

SKILLS

LANGUAGES

- Javascript
- TypeScript
- HTML
- Css

FRAMEWORKS/LIBRARIES

- Next.js
- React.js
- Node.js
- Tailwind CSS
- Prisma
- Framer Motion
- ShadCN

TOOLS

- Git
- GitHub
- Figma
- Swagger

PROJECT EXPERIENCE

LabInView – Dynamic platform for Medical Laboratory Student and Professionals to share knowledge, insights, and expertise.

- Built with NextJs, TypeScript , TailwindCSS , Neon Database for quick rendering, clean layouts, and smooth interactive features
- Secure user authentication for personalized and protected access

- Medical professionals can Post Content, Download Resources, Get access to Internships, Jobs and Exchange ideas
- Interactive replies enable knowledge exchange and collaborative learning
- Engaging environment designed to foster professional growth and community building

FlexoAI — AI-powered platform that generates personalized strength training programs tailored to each user's goals, experience, and schedule.

- Built with TypeScript, Next.js (App Router), and TailwindCSS for a fast, SEO-friendly, fully responsive experience, with the entire frontend and backend unified in a single codebase for streamlined Vercel deployment
- Secure authentication and session management enable personalized onboarding, account access, and persistent user profiles
- Users complete a guided questionnaire (goals, experience level, schedule, equipment, injuries) that drives dynamic, AI-generated training programs
- Integrated with an LLM via OpenRouter to generate structured, individualized weekly training plans, including exercise selection, sets/reps, RPE targets, and progression strategy
- Plans are versioned and regenerable, letting users refine their program over time while preserving prior versions
- PostgreSQL database (via Prisma ORM) persists user profiles and training plan history, with type-safe queries across the full stack
- RESTful API routes handle profile management, plan generation, and retrieval, cleanly separating business logic from presentation

SmeGear- Scalable platform empowering instructors to teach and students to learn with ease.

- Developed using TypeScript, Next.js, and TailwindCSS to ensure high performance, scalability, SEO optimization, and a responsive, modern user experience
- Secure user authentication enabling personalized access and account management
- Instructors can seamlessly upload, organize, and monetize their courses
- Students can purchase, access, and track learning progress in an engaging environment
- API endpoints integration ensures smooth data flow, payments, and third-party service connectivity

CERTIFICATIONS

- CheckLearn Web Development Certificate
- OIC Hub Website Development Certificate
- FreeCodeCamp FrontEnd Web Development Certificate

INTERESTS

Football: Arsenal FC, Odegaard **Watching Netflix:** Ozark, Billions, Breaking Bad and House of Cards.
